

AUGUSTO VIDAL

Senior Full-Stack / Product Engineer | TypeScript, Angular, Node.js, SQL & AI-Assisted Development

Buenos Aires, Argentina | Remote | augustovidal94@gmail.com | +54 11 491 44220 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior full-stack and product-minded engineer with 8+ years of experience delivering client-facing and internal web platforms across fintech, manufacturing, startups and B2C consulting. Strong JavaScript/TypeScript background spanning Angular, React and Node.js, with hands-on backend and data work using Laravel/PHP, REST APIs and SQL databases. Owns the delivery lifecycle from requirements and planning through implementation, testing, deployment and production support, translating business and customer needs into reliable, maintainable software. Uses AI-assisted engineering workflows to accelerate codebase exploration, debugging, refactoring, test generation and documentation while keeping technical decisions and validation engineer-led.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, Angular, React, Ionic, HTML5, CSS3, responsive UI

Backend & APIs: Node.js, REST APIs, ESB integrations, PHP, Laravel, Spring Boot

Data & Engineering: SQL, PostgreSQL, MySQL, MongoDB, Docker, CI/CD, Jenkins, GitHub, Bitbucket, Sentry, Bugsnag
Product & Collaboration: Agile/Scrum, requirements, feature prioritization, code review, refactoring, documentation, async teamwork

AI-Assisted Engineering: Claude Code, GitHub Copilot, codebase exploration, implementation planning, debugging, refactoring, test generation, documentation, technical decision support

PROFESSIONAL EXPERIENCE

Full Stack Developer | Balanz Capital

Sep 2021 - Present

- Build and maintain client-facing and internal platforms, including Angular frontends and Node.js/ESB services for the Investment Portal.
- Deliver across planning, implementation, testing, deployment and production support for software used in financial workflows.
- Modernize legacy Angular applications and improve maintainability through refactoring, documentation and code review.
- Apply AI-assisted workflows to analyze codebases, accelerate debugging and implementation, generate tests and documentation, and validate outputs through testing and code review.
- Partner with business and marketing stakeholders to turn requirements into institutional web experiences and platform improvements.

Full Stack Developer / Digital Implementation | Freelance

2018 - Present

- Deliver end-to-end websites, landing pages and CMS experiences for B2C clients using JavaScript, PHP, WordPress and responsive frontend practices.
- Connect technical delivery with business outcomes through SEO, analytics, campaign implementation and conversion-focused improvements.

System Analyst / Full Stack Developer | Piero S.A.I.C.

Oct 2017 - Sep 2021

- Built the company's client platform from the ground up with an Angular frontend and Laravel backend.
- Developed internal business applications that improved operational workflows and stakeholder visibility.
- Maintained production systems built with Vanilla JavaScript and PHP, delivering bug fixes, feature updates and ongoing support.

SELECTED PRODUCT WORK

Volunteer Developer | QuienXMi

Current

- Contribute to a marketplace startup connecting trade workers with clients, collaborating on user flows, feature prioritization and practical product delivery in a lean team.
